EXPERIENCE

Senior Software Developer

Conperio Technology Solutions, St. Louis, MO

JAN 2014 - PRESENT

I develop software for the manufacturing, insurance, and food/beverage industries, with a focus on ERP software and industrial automation.

Main duties:

- System architecture and design
- Application programming, feature development, bug fixes
- User interface design for desktop and mobile
- Work with customers and users to document requirements
- Provide estimates
- Mentor junior developers
- Provide technical info on sales calls
- Participate in on-site technology assessments

Main technologies used:

- ASP.NET Core (C#)
- SQL Server 2012 and newer
- AngularJS 1.x
- Bootstrap 3 & 4
- Vue.js 2.x
- Vuetify 1.x
- SignalR / WebSockets
- Git
- Azure
- Jenkins
- SSRS

MANAGEMENT

Requirements gathering

On-site tech assessments

Software estimates/quotes

UI standards documentation

Customer support

Senior Software Developer

Kansys, Inc., Olathe, KS

SEPT 2005 - DEC 2013

I wrote software for the telecommunications industry, including applications for order management, bill parsing, payment collections, and more. Our primary UI used ASP.NET WebForms, but I also wrote console apps, Windows Services, and Windows Forms.

Main technologies used:

- ASP.NET
- JavaScript
- jQuery
- SQL Server
- Oracle
- MongoDB
- SSRS
- Jasper Reports
- Java
- Android

Between larger projects, I was the team lead and Android developer for Kansys Apps. The most popular app had over a million installs.

Technology Contractor @ Sprint Overland Park, KS

SEPT 2004 - SEPT 2005

VBA programming

EDUCATION

Kansas State University B.S. Information Systems

Part of the Computer Science Department at the College of Engineering. I also obtained a Business Minor.
